BOAT DATA CODES

SECTION 1--OUTER HULL MATERIAL (HUL) FIELD CODES

The code from the list below that best describes the material of which the boat's outer hull is made should be entered in the HUL Field.

Material	Code
Metal (aluminum, steel, etc.)	ML
Plastic (fiberglass, uniglass, etc.)	PL
Wood (cedar, plywood, fir, etc.)	WD
Other	OT

SECTION 2--PROPULSION (PRO) FIELD CODES

The following list contains PRO Field Codes:

Type of Propulsion	Code
Inboard ¹ (includes inboard/outboard, stern drive, and inboard/outdrives)	IN
Manual (oars, paddles, etc.)	MP
Outboard ²	OB
Sail only	SA
Sail w/Auxiliary Inboard Power	SI
Sail w/Auxiliary Outboard Power	SO

SECTION 3--CANADIAN VEHICLE INDEX PROPULSION (PRO) FIELD CODES

The following list contains Canadian PRO Field codes:

Type of Propulsion	Code
Equipped with sails (could also have motor)	SAIL
Inboard	INB
Main engine inboard with external drive train	INOUT
Outboard	OUTB
Other (oars, paddles--clarified in the MIS Field)	OT

¹Any boat with mechanical propulsion (engine or motor) mounted inside the boat as a permanent installation.

²Any boat with mechanical propulsion (engine or motor) NOT located within the hull as a permanent installation. Generally the engine or motor is mounted on the transom at the rear of the boat and is considered portable.

SECTION 4--BOAT MAKE (BMA) AND BRAND NAME (BRA) FIELD CODES

4.1 BMA AND BRA FIELD

Boats manufactured in the United States (except military vessels) have a three-character U.S. Coast Guard manufacturer's identification code as the first three characters of the manufacturer's assigned boat hull number. Some large manufacturers who have several boat building plants have been assigned multiple codes by the U.S. Coast Guard. When entering a record for a boat made by such a manufacturer, the BMA Field code should agree with the first three characters of the boat hull number.

Canadian manufacturers may apply to the U.S. Coast Guard for a manufacturer's identification code. If the U.S. Coast Guard assigns a code, it will begin with the alphabetic Z.

Section 4.2 contains BMA and BRA Field Codes for boat and boat part manufacturers. For Boat File records, if a code is not listed, the code MISC should be entered as characters 1 through 4 of the BMA Field with the actual manufacturer's name appearing in positions 5 through 24. If the manufacturer's name is not known, positions 5 through 24 of the BMA Field should be used to describe the boat including any information which can lead to the determination of the manufacturer's name. If a brand name for a part is not listed, a Vehicle/Boat Part File record may be entered using the generic code PART in the BRA Field with information concerning the manufacturer placed in the Miscellaneous Field. For unlisted makes, the CJIS Division staff should be contacted at 304-625-3000 for code assignments.
